Merry Christmas and a happy and successful New Year

Marc Herrmann submitted his PhD thesis

With a huge sigh of relief Marc Herrmann submitted his PhD thesis in December. His defense will probably take place in early spring.

Jonas Berberich successfully defended his PhD thesis

On Dec. 18 Jonas defended his PhD thesis. His examiners were Komla Domelevo, Praveen Chandrashekar and myself, who gave him top marks for his exam.

The horizontal square board of his PhD cap, built by the work group, was balanced by a figure of Jonas above the scull cap, representing the well-balanced numerical methods Jonas worked on. - His fun PhD party took place online, with Jonas treating everyone to take-out pizza.
