Simon Markfelder has been offered a “junior professorship” in Konstanz

Pictures from our “Carnival” seminar

It is Carnival time, so for our Oberseminar last Thursday everyone dressed up. See below for yourself.

Junming Duan

These days in Germany an excellent path towards a professorship after the PhD is via a so called “junior professorship”. In other countries this corresponds to an assistant professorship *without* a tenure option. Despite this lack of tenure, in Germany it is considered an honor for a post-doc to be awarded such a position. If they continue to do good scientific work as a junior professor, chances are quite good that they will become a professor at some other German university.

Konstanz university located on the beautiful Lake Constance

Simon’s first ever interview for a junior professorship was successful - the university of the beautiful town of Konstanz gave him the position. This is great news for his career, with Simon being three years out of his PhD. He most certainly deserves this position.
